

We have managed to progress with only minimal press advertising. This is great as it keeps our prices down. Pleasingly, most enquiries are coming from the medical sector - GPs, Physios, Chiropractors, etc., and of course the Occupational Therapy staff at the Haywood have been a great help to us with advice and patient referrals.

THANK YOU

Special thanks to Christine Symcox and her team at Disability Solutions (Independent Living Centre/ DIAL), Hanley. To see our name (after only a few months trading) alongside the likes of long- established Wardles, as an approved and recognized supplier was very flattering yet fantastic!

A well deserved mention to Jeff Dean, the multi-skilled non-stop engine who has single-handedly transformed our former Nat West Bank building to its present glory... his talents always amaze. For example it was only mentioned casually over a pint one weekend that one of our clients was having trouble operating the power chair handset due to her osteo-arthritis... within hours an extension modification was invented designed and produced...bingo! If any riser/recliner chair users have difficulty with the control please call, one will be supplied and fitted free of charge.

Robert at Keys of Clacton-on-Sea is apparently providing a very efficient service with the supply of quality (any size) sheets for your adjustable beds. Comments would be appreciated from anyone who has done business with him.
