

# OLD AGE? NOT AS MOBILE AS YOU'D LIKE? CCC ARE GOING TO MAKE YOU LAUGH ABOUT IT!!

By Christina Roper, Clarion Reporter

There are more octogenarians walking around in the 21st century than the total amount of all those who lived during previous centuries! That official fact takes some sinking in - but yes, we are all living longer. But with old age comes inevitable problems, the old joints and other bits we were born with often don't work as well - causing mobility problems.

When Wolstanton based Castle Comfort Centre was formed at the end of the last century it wasn't long before the company began to claim that they could "often do more for people than doctors can".

Dr Neil Stirling of Castle Comfort explained, "The medical profession's treatment is often based on science and advances in these fields are undoubtedly helping us all to live longer. "But there are scores of chronic conditions that simply cannot be cured, arthritis, joint and back problems etc - the list is very long. "People come into our showrooms often depressed that they have been put on stronger pain killers, or simply told that they are 'getting on'. "CCC cannot cure these problems but the availability of modern tangible and

attractive products means they can be helped from a comfort and mobility angle. "Despite it costing money - we can remove depression, usually make them laugh and ensure that they go home feeling far better than if they had walked into the doctor's surgery. "We have changed the mentality of people suffering with incurable problems. "Old age is to be looked forward to, enjoyed, and something to be grateful for - just leave it to us to help with the snags". Dr Stirling concluded "There is no better money spent than on a stairlift, riser recliner chair, scooter or adjustable bed, and the thousands of our clients worldwide continually confirm to us, and tell their friends - 'CCC can make you happy, mobile, independent, comfortable....and even laugh! Few pills do that!'"

**Editor's note- Doctor Stirling is undoubtedly the best person around to make these comments. His family became clients of CCC several years ago and despite very nearly reaching octogenarian status himself, involvement at Wolstanton means his knowledge of the benefits of available products is vast.**

## CCC'S COURTESY CALL

Staff at Castle Comfort Stairlifts were delighted to receive a surprise visit from the founder of the renowned CAMPAIGN FOR COURTESY. The Reverend Ian Gregory needs little introduction to many Clarion readers as this most highly respected member of the clergy has appeared countless times on television and in the press. Almost two decades have been dedicated to single-handedly pioneering the way to ensuring that good manners and politeness do not disappear totally from our society.

Ian, of course, is *far too young, fit and healthy* to require any of Castle Comfort's products or services.... yet couldn't resist a ride on a stairlift, after all - who knows what may be needed after the *next* two decades!

*Pictured, as courteous as ever -  
The Reverend Ian Gregory. (Thank you)*
