

The new *dimension* in bathlifts from

**Castle
COMFORT
Centre**

Installation

The Revolution can be used immediately after fully charging the battery. The handset will automatically check the condition of the battery and show the remaining power through a simple light indicator.

Power Supply

The Revolution comes with a plug top battery recharger. A solid red light indicates charging is in operation, and flashes when the charging is complete.

The power pack includes a 12V storage battery which is accommodated in a robust ABS plastic housing.

Two Piece System

The Revolution can be disassembled into two parts for ease of transfer and storage, making it lightweight and portable.

Push Button Operation

Bathlift lowers and reclines at the press of a button.

Optimum Comfort

When fully lowered, the bathlift can be reclined for optimum comfort and increased immersion.

Maximum user weight: 130kg (21st)
